I feel great satisfaction and pride to announce, that Badi UI Zaman, who is one of my dearest students, has achieved the **Red Hat Certified Security Specialist (RHCSS)** status in May 2010. As per confirmed from the RedHat Global Learning Services records, he is ***Pakistan's first RHCSS***

!

Badi, congratulations again! I am proud of you! Keep it up.

For those seeking a career in Information Security, I would highly recommend to benefit from Badi's technical knowledge of the subject, and experience. He is currently working as an independant consultant and trainer. Badi is reachable via: bnhashmi at wbitt dot com

Reference e-mail from Red Hat GLS:

"According to my records it seems like there is no other RHCSS certified person in your country. It is very likely that you are number one. Again congratulations on your achievement."
