In an attempt to provide easier and faster downloads, we have moved all of the Downloads to Google Cloud. Most of the URLs in the site articles, related to downloads, are now invalid. Visitors are requested to visit <http://downloads.wbitt.com> , and browse their way to the desired content. The new website (hosted on Google Sites), provide a way to directly view the video, without a need to download the complete file. A separate download link is always provided for 'just in case'.
