---

I have started making CBTs about Kubernetes in Urdu/Hindi. The first video of [this series](#) , which is an introduction to Kubernetes, is [here on YouTube](#)

. It talks about:

- what exactly is Kubernetes?
- what are it's components?
- how it works?
- why should we use it?
- plus - a small demo about pod creation, resilience, and scaling up and down

The complete series can be found in [the playlist](#) at <https://youtube.com/wbitt> . This video does not cover Kubernetes installation. It does not even cover how applications are run in a Kubernetes cluster. These topics will be covered in later videos. Though a small demo about pod resilience and scaling in the end.

The presentation used in this video is available from my github repository:
