I have started making CBTs about AWS (Amazon Web Services) in Urdu/Hindi. The first video of [this series](#) , which is an introduction to Kubernetes, is [here on YouTube](#) . It talks about:

- what exactly is AWS?
- what are it's various services / products / offerings?
- why should we use it?

The complete series can be found in [the playlist](#) at <https://youtube.com/wbitt> . This video does not include any hands-on activity. Hands-on, such as how to create EC2 instances, etc, will be covered in later videos.
